PORCELAIN - a kind of white, translucent ceramic. There are products made of New Bone China porcelain and Super White porcelain in our offer.

SUPER WHITE PORCELAIN – translucent, cold white kind of porcelain, produced at temperature around 1400° C.

NEW BONE CHINA PORCELAIN - warm, light cream colour kind of porcelain, produced at around 1300° C. NBC porcelain products are available in 19 colors from the basic offer.

EU PORCELAIN - porcelain made in Poland

STONEWARE – white, not translucent ceramic produced at a temperature around 1200° C

BASIC OFFER - 19 glaze colors, including 3 matt, available outside, inside or both inside and outside (possible color combinations). Products in basic colors can be decorated with ceramic decal, engraving, blackboard print, Magic Print and organic decal. Dishwasher - safe.

PANTONE MATCHED PAINTING - selected colour from the Pantone palette is spray painted outside, inside or both inside and outside (possible color combinations). Shiny or matt finish. Painted products can be decorated with organic decal, engraving or Magic Print. Painted surface is not scratch resistant.

CERAMIC DECAL - a way of permanent ceramic decoration. It allows to decorate large surfaces, not only on the outer wall of the product but also inside, at the bottom, on the handle. Ceramic decal allows to transfer to the ceramic vectorized graphics but also raster prints and CMYK - photo print. Ceramic decal is fired at temperature around 800° C and it is dishwasher-safe, resistant to high temperature, chemicals and scratch-proof.

Advantages:	- dishwasher-safe (except glossy gold and platinum)	decoration:
	- large decoration area	- inside
	- personalization	- under the handle
	- vector and raster printing	- on the handle
	- CMYK (photo) decorations	- bottom
	- gloss gold / platinum	

Limitations: - not all pantone colors can be reached

ORGANIC DECAL - a way to decorate large surfaces of ceramics, guaranteeing clean, vibrant colors and full Pantone range. Decoration is not scratch-proof and not resistant to mechanical damage.

Advantages:

- large decoration area
- all Pantone colors available (except metallic effects)
- personalization
- vector and raster printing
- CMYK (photo) decorations
- fluorescent paints available

Limitations:

- not scratch-proof
- only outside decorations
- no gloss gold, platinum

DIRECT PRINTING - economic method of decorating a limited surface of ceramic items. Decoration is with ceramic paints and fired at about 800 degrees Celsius. Direct print is dishwasher-safe, resistant to high temperature, chemicals and scratch-proof.

Advantages:

- low price
- dishwasher-safe

Limitations:

- decoration up to 4 colors, no raster print
- limited surface of decoration
- not all Pantone colors can be reached

ENGRAVING (SANDBLASTING) - obtaining a decorative effect by sanding the surface of the ceramic. Sandblasting removes the top layer of enamel in the selected area. Sandblasting can be done on a white or colored mug.

EDGE PAINTING - additional edge decoration for mugs or cups. This decoration is handmade and is dishwasher-safe, resistant to high temperature, chemicals and scratch-proof.

CHALKBOARD PRINT - elements of decoration that can be used for chalk writing. Available in black or blue. Decoration is dishwasher-safe, resistant to high temperature, chemicals and scratch-proofs. For printed products, we add a piece of chalk in the set.

MAGIC PRINT - a special temperature-sensitive layer that covers design underneath. Any shape in black colour. The Magic Print layer disappears when the boiling water is poured, revealing the main decoration. Magic Print is not abrasion-resistant.
